# INDEX TO AUTHORS

A

**Adams, Elijah.** See *Roberts, Adams, and White,* 379

**Appel, Muriel.** See *Williamson and Appel,* 769

**Armstrong, Marvin D.,** and **Binkley, Francis.** On the failure of DL-homoserine to support growth on a methionine-deficient diet, 889

**Avakian, Souren.** See *Martin, Avakian, and Moss,* 495

B

**Babb, Virginia.** See *Colio and Babb,* 405

**Barker, H. A.** See *Stadtman and Barker,* 1039

**Barry, Guy T., Sato, Yoshio,** and **Craig, Lyman C.** Distribution studies. X. Attainment of equilibrium, 209

—, —, and —. XII. Purity of crystalline penicillins, 221

—. See *Sato, Barry, and Craig,* 217

**Beiler, J. M.,** and **Martin, Gustav J.** Inhibition of hyaluronidase action by derivatives of hesperidin, 31

**Belinskey, Carol.** See *Carter, Belinskey, Clark, Flynn, Lytle, McCasland, and Robbins,* 415

**Bernheim, Frederick, Bernheim, Mary L. C.,** and **Wilbur, Karl M.** The reaction between thiobarbituric acid and the oxidation products of certain lipides, 257

**Bernheim, Mary L. C.** See *Bernheim, Bernheim, and Wilbur,* 257

**Berson, Bella Z.** See *Burch, Lowry, Bessey, and Berson,* 791

**Bessey, Otto A.** See *Burch, Lowry, Bessey, and Berson,* 791

**Beyer, G. Thannhauser.** See *Dounce and Beyer,* 859

—. See *Dounce, Rothstein, Beyer, Meier, and Freer,* 361

**Biely, Jacob.** See *Halpern and Biely,* 817

**Binkley, Francis.** Birefringence of flow of preparations of myosin, 385

—. See *Armstrong and Binkley,* 889

**Bird, H. R., Rubin, Max,** and **Groschke, A. C.** A chick growth factor in cow manure. VII. Its stability and solubility, 611

**Bischoff, Fritz,** and **Pilhorn, Harry R.** The state and distribution of steroid hormones in biologic systems. III. Solubilities of testosterone, progesterone, and α-estradiol in aqueous salt and protein solution and in serum, 663

**Bodansky, Oscar.** The inhibitory effects of DL-alanine, L-glutamic acid, L-lysine, and L-histidine on the activity of intestinal, bone, and kidney phosphatases, 465

**Borsook, Henry, Deasy, Clara L., Haagen-Smit, A. J., Keighley, Geoffrey,** and **Lowy, Peter H.** Isolation of a peptide in guinea pig liver homogenate and its turnover of leucine, 1041

**Boyd, M. John, Logan, Milan A.,** and **Tytell, Alfred A.** A microbiological procedure for the assay of amino acids with *Clostridium perfringens (welchii)* BP6K, 1027

—, —, and —. The growth requirements of *Clostridium perfringens (welchii)* BP6K, 1013

**Brickson, W. L.** See *Hankes, Henderson, Brickson, and Elvehjem,* 873

**Brown, Betty.** See *Daniel, Scott, Heuser, and Norris,* 71

**Brown, George Bosworth, Petermann, Mary L.,** and **Furst, Sidney S.** The incorporation of adenine into pentose and desoxypentose nucleic acids, 1043

**Bubl, Edward C.,** and **Butts, Joseph S.** The utilization of D-tyrosine for growth in the rat, 637

**Burch, Helen B., Lowry, Oliver H., Bessey, Otto A.,** and **Berson, Bella Z.** The determination of iron in small volumes of blood serum, 791

**Burris, R. H.** See *Olson, Fager, Burris, and Elvehjem,* 319

**Butts, Joseph S.** See *Bubl and Butts,* 637

C

**Carter, Herbert E., Belinskey, Carol, Clark, R. K., Jr., Flynn, Edwin H., Lytle, Betty, McCasland, G. E.,** and **Robbins, Mary.** Oxidation of inositol by *Acetobacter suboxydans,* 415

—and **Loo, Y. H.** Oxidation of hydroxy-L-proline by periodate, 723

**Chaikoff, I. L., Lerner, S. R., Entenman, C.,** and **Dauben, W. G.** On the conversion of palmitic acid labeled with radioactive carbon to glucose by the alloxan-diabetic rat, 1045

—. See *Wolff and Chaikoff,* 555

**Chandler, Joseph P.** See *du Vigneaud, Moyer, and Chandler,* 477

**Chanutin, Alfred.** See *Gjessing, Ludewig, and Chanutin,* 683

**Chargaff, Erwin.** See *Magasanik and Chargaff,* 173

**Cheldelin, Vernon H.** See *King and Cheldelin,* 273

**Clark, R. K., Jr.** See *Carter, Belinskey, Clark, Flynn, Lytle, McCasland, and Robbins,* 415

**Cohen, Philip P.,** and **Grisolia, Santiago.** The intermediate rôle of carbamyl-L-glutamic acid in citrulline synthesis, 389

—. See *McGilvery and Cohen,* 813

**Cohen, Seymour S.** The synthesis of bacterial viruses. I. The synthesis of nucleic acid and protein in *Escherichia coli* B infected with $T_2r^+$ bacteriophage, 281

—. II. The origin of the phosphorus found in the desoxyribonucleic acids of the $T_2$ and $T_4$ bacteriophages, 295

**Colio, Lloyd G.,** and **Babb, Virginia.** Study of a new stimulatory growth factor, 405

**Comar, C. L., Davis, George K.,** and **Singer, Leon.** The fate of radioactive copper administered to the bovine, 905

**Craig, Lyman C.** See *Barry, Sato, and Craig,* 209, 221

—. See *Sato, Barry, and Craig,* 217

**Critchfield, Frances H.** See *Shaffer and Critchfield,* 489

D

**Damron, Charlotte M.** See *Roe, Mills, Oesterling, and Damron,* 201

**Daniel, Louise J., Scott, M. L., Heuser, G. F.,** and **Norris, L. C.** Further studies of unidentified factors required in the nutrition of *Lactobacillus casei,* 71

**Dauben, W. G.** See *Chaikoff, Lerner, Entenman, and Dauben,* 1045

**Davis, George K.** See *Comar, Davis, and Singer,* 905

**Deasy, Clara L.** See *Borsook, Deasy, Haagen-Smit, Keighley, and Lowy,* 1041

**Dorfman, Albert, Ott, Melvin L.,** and **Whitney, Richard.** The hyaluronidase inhibitor of human blood, 621

**Dounce, Alexander L.,** and **Beyer, G. Thannhauser.** The arginase activity of isolated cell nuclei, 859

—, **Rothstein, Aser, Beyer, G. Thannhauser, Meier, Rebecca,** and **Freer, Richard M.** A detailed procedure for the preparation of highly purified adenosine triphosphate, 361

E

**Elion, Gertrude B.** See *Hitchings, Elion, and VanderWerff,* 1037

—. See *Hitchings, Elion, VanderWerff, and Falco,* 765

**Elvehjem, C. A.** See *Hankes, Henderson, Brickson, and Elvehjem* 873

—. See *Olson, Fager, Burris, and Elvehjem,* 319

**Engel, Frank L., Pentz, E. Irene,** and **Engel, Mildred G.** On the use of the nephrectomized rat for the study of rapid changes in nitrogen metabolism, 99

**Engel, Mildred G.** See *Engel, Pentz, and Engel*, 99
**Entenman, C.** See *Chaikoff, Lerner, Entenman, and Dauben*, 1045

F

**Fager, E. E. C.** See *Olson, Fager, Burris, and Elvehjem*, 319
**Falco, Elvira A.** See *Hitchings, Elion, VanderWerff, and Falco* 765
**Feld, Emily A.** See *Nachmansohn, Rothenberg, and Feld*, 247
**Ferger, Martha F.**, and **du Vigneaud, Vincent.** The microbial growth inhibition produced by optical isomers of β-2-thienylalanine, 241
**Fling, Marguerite.** See *Kobayashi, Fling, and Fox*, 391
**Floyd, Curtis S.** See *Gjessing, Ludewig, and Chanutin*, 683
**Flynn, Edwin H.** See *Carter, Belinskey, Clark, Flynn, Lytle, McCasland, and Robbins*, 415
**Folch, Jordi.** The chemical structure of phosphatidyl serine, 439
**Foote, Murray W.** See *Little, Sproston, and Foote*, 335
**Fox, Sidney W.** See *Kobayashi, Fling, and Fox*, 391
**Fraenkel-Conrat, Heinz**, and **Olcott, Harold S.** Reaction of formaldehyde with proteins. VI. Cross-linking of amino groups with phenol, imidazole, or indole groups, 827
**Frantz, Ivan D., Jr., Zamecnik, Paul C., Reese, J. W.**, and **Stephenson, Mary L.** The effect of dinitrophenol on the incorporation of alanine labeled with radioactive carbon into the proteins of slices of normal and malignant rat liver, 773
**Freer, Richard M.** See *Dounce, Rothstein, Beyer, Meier, and Freer*, 361
**Fried, Josef.** See *Titus and Fried*, 57
**Friedgood, Harry B., Garst, Josephine B.**, and **Haagen-Smit, A. J.** A new method for the separation of androgens from estrogens and for the partition of estriol from the estrone-estradiol fraction. With special reference to the identification and quantitative microdetermination of estrogens by ultraviolet absorption spectrophotometry, 523
**Friedkin, Morris**, and **Lehninger, Albert L.** Phosphorylation coupled to electron transport between dihydrodiphosphopyridine nucleotide and oxygen, 757
**Fruton, Joseph S.** See *Gutmann and Fruton*, 851
—. See *Simmonds and Fruton*, 705
**Furst, Sidney S.** See *Brown, Petermann, and Furst*, 1043

G

**Gallant, Dorothy Leaf.** See *Toennies and Gallant*, 451
**Garber, M. J.** See *Schweigert, German, and Garber*, 383
**Garst, Josephine B.** See *Friedgood, Garst, and Haagen-Smit*, 523
**Genest, R. N.** See *Saunders, Siu, and Genest*, 697
**German, H. L.** See *Schweigert, German, and Garber*, 383
**Gjessing, Erland C., Ludewig, Stephan**, and **Chanutin, Alfred.** Fractionation, electrophoresis, and chemical studies of proteins in sera of control and injured goats, 683
**Goodwin, Mari P.** See *Haines, Johnson, Goodwin, and Kuizenga*, 925
**Goranson, E. S., Hamilton, J. E.**, and **Haist, R. E.** Changes in phosphate and carbohydrate metabolism in shock, 1
**Grant, W. Morton.** Observations on blood acetol after administration of acetol, methyl alcohol, and formaldehyde to rabbits, 93
**Green, Arda Alden.** See *Rapport, Green, and Page*, 735
**Greenberg, Leon A.** See *Lester and Greenberg*, 903
**Greep, Roy O.** See *Perlmutter and Greep*, 915
**Grinstein, Moisés, Kamen, Martin D.**, and **Moore, Carl V.** Observation on the utilization of glycine in the biosynthesis of hemoglobin, 767

**Grisolia, Santiago.** See *Cohen and Grisolia*, 389
—. See *Mehler, Kornberg, Grisolia, and Ochoa*, 961
**Groschke, A. C.** See *Bird, Rubin, and Groschke*, 611
**Gutmann, Helmut R.**, and **Fruton, Joseph S.** On the proteolytic enzymes of animal tissues. VIII. An intracellular enzyme related to chymotrypsin, 851

H

**Haagen-Smit, A. J.** See *Borsook, Deasy, Haagen-Smit, Keighley, and Lowy*, 1041
—. See *Friedgood, Garst, and Haagen-Smit*, 523
**Haines, William J., Johnson, Richard H., Goodwin, Mari P.**, and **Kuizenga, Marvin H.** Biochemical studies on hog testicular extract. I. Isolation and identification of 5-pregnen-3(β)-ol-20-one, 925
**Haist, R. E.** See *Goranson, Hamilton, and Haist*, 1
**Halpern, George R.**, and **Biely, Jacob.** The utilization of vitamin A in various carriers, 817
**Hamilton, J. E.** See *Goranson, Hamilton, and Haist*, 1
**Hankes, L. V., Henderson, L. M., Brickson, W. L.**, and **Elvehjem, C. A.** Effect of amino acids on the growth of rats on niacin-tryptophan-deficient rations, 873
**Harding, W. M.**, and **Shive, William.** Biochemical transformations as determined by competitive analogue-metabolite growth inhibitions. VIII. An interrelationship of methionine and leucine, 743
**Hauge, S. M.** See *Novak and Hauge*, 235, 647
**Hegsted, D. Mark**, and **Lipmann, Fritz.** The pantothenic acid content of coenzyme A by chick assay, 89
—. See *Ling, Hegsted, and Stare*, 803
**Henderson, L. M.** See *Hankes, Henderson, Brickson, and Elvehjem*, 873
**Heuser, G. F.** See *Daniel, Scott, Heuser, and Norris*, 71
**Hitchings, George H., Elion, Gertrude B.**, and **VanderWerff, Henry.** The limitations of inhibition analysis, 1037
—, —, —, and **Falco, Elvira A.** Pyrimidine derivatives as antagonists of pteroylglutamic acid, 765
**Hoberman, Henry D.** See *White, Hoberman, and Szego*, 1049
**Holzman, George**, and **Niemann, Carl.** A spectrophotometric study of blood group A-specific substance isolated from hog gastric mucosa, 305
**Horowitz, N. H.**, and **Srb, Adrian M.** Growth inhibition of *Neurospora* by canavanine and its reversal, 371
**Houlahan, Mary B.** See *Mitchell and Houlahan*, 883
**Huebner, Charles F.**, and **Jacobs, Walter A.** The aconite alkaloids. XXI. Further oxidation studies with atisine and isoatisine, 1001

I

**Irvin, Elinor Moore.** See *Irvin and Irvin*, 577, 589
**Irvin, J. Logan**, and **Irvin Elinor Moore.** Apparent dissociation exponents of quinine, pamaquine, and a quinolylpiperidylcarbinol; application of an extended pH scale, 577
— and —. A fluorometric method for the determination of pamaquine, SN-13276, and SN-3294, 589

J

**Jacobs, Walter A.** See *Huebner and Jacobs*, 1001
**Jensen, Robert, Snellman, Olle**, and **Sylvén, Bengt.** On the inhomogeneity of commercial heparin preparations from the physicochemical point of view, 265
**Johnson, Marvin J.** See *Peterson and Johnson*, 775
**Johnson, Richard H.** See *Haines, Johnson, Goodwin, and Kuizenga*, 925
**Jones, Hardin B.** See *Reid and Jones*, 427

**Junqueira, Plinio B.**, and **Schweigert, B. S.** Further studies on the rôle of vitamin $B_6$ in the metabolism of tryptophan by the rat, 605

K

**Kalckar, Herman M., Kjeldgaard, Niels Ole**, and **Klenow, Hans.** Inhibition of xanthine oxidase and related enzymes by 6-pteridyl aldehyde, 771

**Kamen, Martin D.** See *Grinstein, Kamen, and Moore*, 767

**Kaplan, Nathan O.**, and **Lipmann, Fritz.** The assay and distribution of coenzyme A, 37

**Keighley, Geoffrey.** See *Borsook, Deasy, Haagen-Smit, Keighley, and Lowy*, 1041

**Kibrick, Andre C.** A polariscopic study of glutamic acid and pyrrolidonecarboxylic acid, 845

**Kielley, W. Wayne**, and **Meyerhof, Otto.** A new magnesium-activated adenosinetriphosphatase from muscle, 387

**King, Tsoo E.**, and **Cheldelin, Vernon H.** Pantothenic acid studies. IV. Propionic acid and β-alanine utilization, 273

**Kjeldgaard, Niels Ole.** See *Kalckar, Kjeldgaard, and Klenow*, 771

**Klenow, Hans.** See *Kalckar, Kjeldgaard, and Klenow*, 771

**Klotz, Irving M.** See *Melchior, Mellody, and Klotz*, 81

**Kobayashi, Yutaka, Fling, Marguerite**, and **Fox, Sidney W.** Antipodal specificity in the inhibition of growth of *Escherichia coli* by amino acids, 391

**Kornberg, Arthur.** Nucleotide pyrophosphatase and triphosphopyridine nucleotide structure, 1051

—, **Ochoa, Severo**, and **Mehler, Alan H.** Spectrophotometric studies on the decarboxylation of β-ketoacids, 159

—. See *Mehler, Kornberg, Grisolia, and Ochoa*, 961

—. See *Ochoa, Mehler, and Kornberg*, 979

**Krahl, M. E.**, and **Park, C. R.** The uptake of glucose by the isolated diaphragm of normal and hypophysectomized rats, 939

**Kuizenga, Marvin H.** See *Haines, Johnson, Goodwin, and Kuizenga*, 925

**Kun, Ernest.** Inhibition of the phosphorylation of glucose by meningococcal endotoxin, 761

L

**Lauffer, Max A.** Interaction between tobacco mosaic virus and bovine serum albumin, 481

**Lehninger, Albert L.** See *Friedkin and Lehninger*, 757

**Lepow, Jean Papell.** See *Sealock and Lepow*, 763

**Lerner, S. R.** See *Chaikoff, Lerner, Entenman, and Dauben*, 1045

**Lester, David**, and **Greenberg, Leon A.** The determination of acetone and ketone bodies, 903

**Ling, Chiun-Tong, Hegsted, D. Mark**, and **Stare, F. J.** The effect of pyridoxine deficiency on the tryptophan-niacin transformation in rats, 803

**Ling, Kuo-Huang**, and **Tung, Ta-Cheng.** The oxidative demethylation of monomethyl-L-amino acids, 643

**Lipmann, Fritz.** See *Hegsted and Lipmann*, 89

—. See *Kaplan and Lipmann*, 37

**Little, John E., Sproston, Thomas J.**, and **Foote, Murray W.** Isolation and antifungal action of naturally occurring 2-methoxy-1,4-naphthoquinone, 335

**Logan, Milan A.** See *Boyd, Logan, and Tytell*, 1013, 1027

**Loo, Y. H.** See *Carter and Loo*, 723

**Loring, Hubert S., Roll, Paul M.**, and **Pierce, John G.** A simplified procedure for the preparation of cytidylic acid and diammonium uridylate from yeast nucleic acid, 729

**Lowry, Oliver H.** See *Burch, Lowry, Bessey, and Berson*, 791

**Lowy, Peter H.** See *Borsook, Deasy, Haagen-Smit, Keighley, and Lowy*, 1041

**Luck, J. Murray.** See *Teresi and Luck*, 653

**Ludewig, Stephan.** See *Gjessing, Ludewig, and Chanutin*, 683

**Lytle, Betty.** See *Carter, Belinskey, Clark, Flynn, Lytle, McCasland, and Robbins*, 415

M

**Magasanik, Boris,** and **Chargaff, Erwin.** The stereochemistry of an enzymatic reaction: the oxidation of *l*-, *d*-, and *epi*-inositol by *Acetobacter suboxydans*, 173

**Martin, Gustav J., Avakian, Souren,** and **Moss, Jack.** Studies of pyridoxine displacement, 495

—. See *Beiler and Martin*, 31

**Maw, George A.,** and **du Vigneaud, Vincent.** Dimethyl-β-propiothetin, a new methyl donor, 381

**McCasland, G. E.** See *Carter, Belinskey, Clark, Flynn, Lytle, McCasland, and Robbins*, 415

**McGilvery, R. W.,** and **Cohen, Philip P.** The decarboxylation of L-phenylalanine by *Streptococcus faecalis* R, 813

**Mehler, Alan H., Kornberg, Arthur, Grisolia, Santiago,** and **Ochoa, Severo.** The enzymatic mechanism of oxidation-reductions between malate or isocitrate and pyruvate, 961

—. See *Kornberg, Ochoa, and Mehler*, 159

—. See *Ochoa, Mehler, and Kornberg*, 979

**Meier, Rebecca.** See *Dounce, Rothstein, Beyer, Meier, and Freer*, 361

**Melchior, Jacklyn B., Mellody, Margaret,** and **Klotz, Irving M.** The synthesis of protein by non-proliferating *Escherichia coli*, 81

**Mellody, Margaret.** See *Melchior, Mellody, and Klotz*, 81

**Meyerhof, Otto.** See *Kielley and Meyerhof*, 387

**Mills, Mary B.** See *Roe, Mills, Oesterling, and Damron*, 201

**Minovitch, Eve.** See *Sinclair*, 343, 355

**Mitchell, Herschel K.,** and **Houlahan, Mary B.** An intermediate in the biosynthesis of lysine in *Neurospora*, 883

**Moore, Carl V.** See *Grinstein, Kamen, and Moore*, 767

**Moss, Jack.** See *Martin, Avakian, and Moss*, 495

**Moyer, A. W.** See *du Vigneaud, Moyer, and Chandler*, 477

**Mullins, Lorin J.,** and **Zerahn, Karl.** The distribution of potassium isotopes in biological material, 107

N

**Nachmansohn, David, Rothenberg, Mortimer A.,** and **Feld, Emily A.** Studies on cholinesterase. V. Kinetics of the enzyme inhibition, 247

**Naganna, B.,** and **Narayana menon, V. K.** Erythrocyte pyrophosphatase in health and disease. I. Properties of the enzyme, 501

**Narayana menon, V. K.** See *Naganna and Narayana menon*, 501

**Niemann, Carl.** See *Holzman and Niemann*, 305

**Norris, L. C.** See *Daniel, Scott, Heuser, and Norris*, 71

**Novak, A. F.,** and **Hauge, S. M.** Isolation of the unidentified growth factor (vitamin $B_{12}$) in distillers' dried solubles, 647

—and —. Some properties of an unidentified growth factor in distillers' dried solubles, 235

O

**Ochoa, Severo.** Biosynthesis of tricarboxylic acids by carbon dioxide fixation. I. The preparation and properties of oxalosuccinic acid, 115

—. III. Enzymatic mechanisms, 133

—, **Mehler, Alan H.,** and **Kornberg, Arthur.** Biosynthesis of dicarboxylic acids by carbon dioxide fixation. I.

lsolation and properties of an enzyme from pigeon liver catalyzing the reversible oxidative decarboxylation of *l*-malic acid, 979

—and **Weisz-Tabori, Erna.** Biosynthesis of tricarboxylic acids by carbon dioxide fixation. II. Oxalosuccinic carboxylase, 123

—. See *Kornberg, Ochoa, and Mehler*, 159

—. See *Mehler, Kornberg, Grisolia, and Ochoa*, 961

**Oesterling, M. Jane.** See *Roe, Mills, Oesterling, and Damron*, 201

**Olcott, Harold S.** See *Fraenkel-Conrat and Olcott*, 827

**Olson, O. E., Fager, E. E. C., Burris, R. H.,** and **Elvehjem, C. A.** Folic acid activity in homogenates of rat liver, 319

**Ott, Melvin L.** See *Dorfman, Ott, and Whitney*, 621

**Ott, Walther H., Rickes, Edward L.,** and **Wood, Thomas R.** Activity of crystalline vitamin $B_{12}$ for chick growth, 1047

**Overman, Ralph S.,** and **Wright, Irving S.** A new blood clotting inhibitor, 759

P

**Page, Irvine H.** See *Rapport, Green, and Page*, 735

**Park, C. R.** See *Krahl and Park*, 939

**Pentz, E. Irene.** See *Engel, Pentz, and Engel*, 99

**Perlmutter, Martin,** and **Greep, Roy O.** The uptake of glucose and the synthesis of glycogen by the isolated diaphragm of normal and pituitectomized rats, 915

**Petermann, Mary L.** See *Brown, Petermann, and Furst*, 1043

**Peterson, Merlin H.,** and **Johnson, Marvin J.** The estimation of fatty acids of intermediate chain length by partition chromatography, 775

**Pierce, John G.** See *Loring, Roll, and Pierce*, 729

**Pilhorn, Harry R.** See *Bischoff and Pilhorn*, 663

**Pillemer, Louis.** See *Wittler and Pillemer*, 23

**Pringle, A.** See *Woolley and Pringle*, 327

R

**Rapport, Maurice M., Green, Arda Alden,** and **Page, Irvine H.** Partial purification of the vasoconstrictor in beef serum, 735

**Reese, J. W.** See *Frantz, Zamecnik, Reese, and Stephenson*, 773

**Reid, James C.,** and **Jones, Hardin B.** Radioactivity distribution in the tissues of mice bearing melanosarcoma after administration of DL-tyrosine labeled with radioactive carbon, 427

**Rickes, Edward L.** See *Ott, Rickes, and Wood*, 1047

**Robbins, Mary.** See *Carter, Belinskey, Clark, Flynn, Lytle, McCasland, and Robbins*, 415

**Roberts, Sidney, Adams, Elijah,** and **White, Abraham.** Release of antibody by lymphoid tissue *in vitro*, 379

**Roe, Joseph H., Mills, Mary B., Oesterling, M. Jane,** and **Damron, Charlotte M.** The determination of diketo-*l*-gulonic acid, dehydro-*l*-ascorbic acid, and *l*-ascorbic acid in the same tissue extract by the 2,4-dinitrophenylhydrazine method, 201

**Roll, Paul M.** See *Loring, Roll, and Pierce*, 729

**Rothenberg, Mortimer A.** See *Nachmansohn, Rothenberg, and Feld*, 247

**Rothstein, Aser.** See *Dounce, Rothstein, Beyer, Meier, and Freer*, 361

**Rubin, Max.** See *Bird, Rubin, and Groschke*, 611

S

**Saltzman, Abraham.** Fluorophotometric method for the estimation of salicylate in blood, 399

**Sato, Yoshio, Barry, Guy T.,** and **Craig, Lyman C.** Distribution studies. XI. Isolation of benzylpenicillin containing radioactive sulfur, 217
—. See *Barry, Sato, and Craig*, 209, 221
**Saunders, P. R., Siu, R. G. H.,** and **Genest, R. N.** A cellulolytic enzyme preparation from *Myrothecium verrucaria*, 697
**Schenker, Florence.** See *Daniel, Scott, Heuser, and Norris*, 71
**Schweigert, B. S., German, H. L.,** and **Garber, M. J.** Synthesis of nicotinic acid from tryptophan by the developing chick embryo, 383
—. See *Junqueira and Schweigert*, 605
**Schwert, George W.** A note on the application of the colorimetric ninhydrin determination to studies of enzyme kinetics, 411
**Scott, M. L.** See *Daniel, Scott, Heuser, and Norris*, 71
**Sealock, Robert Ridgely,** and **Lepow, Jean Papell.** Antipernicious anemia extracts and tyrosine metabolism in the scorbutic guinea pig, 763
**Seegers, Walter H.** See *Ware and Seegers*, 565
**Shaffer, C. Boyd,** and **Critchfield, Frances H.** Lipotropic activity and toxicity of methoxinine (oxymethionine), 489
**Shive, William.** See *Harding and Shive*, 743
**Simmonds, Sofia.** Utilization of sulfur-containing amino acids by mutant strains of *Escherichia coli*, 717
— and **Fruton, Joseph S.** The utilization of proline derivatives by mutant strains of *Escherichia coli*, 705
**Sinclair, R. G.** The lecithin, cephalin, and sphingomyelin content of serum. I. As indicated by the choline-phosphorus and nitrogen-phosphorus ratios, 343
—. II. As indicated by the amino nitrogen and non-diffusible phosphorus content after differential hydrolysis of the acetone-insoluble lipides, 355
**Singer, Leon.** See *Comar, Davis, and Singer*, 905
**Singer, Thomas P.** On the mechanism of enzyme inhibition by sulfhydryl reagents, 11
**Siu, R. G. H.** See *Saunders, Siu, and Genest*, 697
**Snell, Esmond E.** See *Volcani and Snell*, 893
**Snellman, Olle.** See *Jensen, Snellman, and Sylvén*, 265
**Somogyi, Michael.** Studies of arteriovenous differences in blood sugar. I. Effect of alimentary hyperglycemia on the rate of extrahepatic glucose assimilation, 189
—. II. Effect of hypoglycemia on the rate of extrahepatic glucose assimilation, 597
**Sproston, Thomas J.** See *Little, Sproston, and Foote*, 335
**Srb, Adrian M.** See *Horowitz and Srb*, 371
**Stadtman, E. R.,** and **Barker, H. A.** Two new reactions producing acetyl phosphate, 1039
**Stare, F. J.** See *Ling, Hegsted, and Stare*, 803
**Stephenson, Mary L.** See *Frantz, Zamecnik, Reese, and Stephenson*, 773
**Strachman, Norma.** See *Rodansky*, 465
**Sylvén, Bengt.** See *Jensen, Snellman, and Sylvén*, 265
**Szego, Clara M.** See *White, Haberman, and Szego*, 1049

T

**Teresi, J. D.,** and **Luck, J. Murray.** The combination of organic anions with serum albumin. VI. Quantitative studies by equilibrium dialysis, 653
**Titus, Elwood,** and **Fried, Josef.** Counter-current distribution studies on streptomycin: the tautomerism of streptomycin, 57

H

**Hemoglobin:** Biosynthesis, glycine use, *Grinstein, Kamen, and Moore*, 767
**Heparin:** Preparations, inhomogeneity, *Jensen, Snellman, and Sylvén*, 265
**Hesperidin:** Hyaluronidase, effect, *Beiler and Martin*, 31
**Histidine:** L-, phosphatase, intestine, bone, and kidney, effect, *Bodansky*, 465
**Homoserine:** DL-, methionine-deficient diet, growth, effect, *Armstrong and Binkley*, 889
**Hormone(s):** Steroid, biological systems, *Bischoff and Pilhorn*, 663
**Hyaluronidase:** Blood, inhibitor, *Dorfman, Ott, and Whitney*, 621
Hesperidin effect, *Beiler and Martin*, 31
**Hydroxy-L-proline:** Oxidation, periodate effect, *Carter and Loo*, 723

**Hyperglycemia:** Alimentary, glucose, extrahepatic, assimilation, relation, *Somogyi*, 189
**Hypoglycemia:** Glucose, extrahepatic, assimilation, *Somogyi*, 597
**Hypophysectomy:** Diaphragm glucose uptake, effect, *Perlmutter and Greep*, 915
*Krahl and Park*, 939
—,glycogen synthesis, effect, *Perlmutter and Greep*, 915

I

**Imidazole:** Amino groups, cross-linking, *Fraenkel-Conrat and Olcott*, 827
**Indole group(s):** Amino groups, cross-linking, *Fraenkel-Conrat and Olcott*, 827
**Inhibition:** Analysis, limitations, *Hitchings, Elion, and VanderWerff*, 1037
**Injury:** Blood serum proteins, effect, *Gjessing, Ludewig, and Chanutin*, 683
**Inositol:** Isomers, oxidation, *Acetobacter suboxydans* rôle, *Magasanik and Chargaff*, 173
Oxidation, *Acetobacter suboxydans, Carter, Belinskey, Clark, Flynn, Lytle, McCasland, and Robbins*, 415
**Intestine:** Phosphatase, DL-alanine, L-glutamic acid, L-lysine, and L-histidine, effect, *Bodansky*, 465
**Iodide:** Inorganic, blood plasma, thyroid function, relation, *Wolff and Chaikoff*, 555
**Iron:** Blood serum, determination, micro-, *Burch, Lowry, Bessey, and Berson*, 791
**Isoatisine:** Oxidation, *Huebner and Jacobs*, 1001
**Isocitrate:** -Pyruvate oxidation-reduction, enzymatic mechanism, *Mehler, Kornberg, Grisolia, and Ochoa*, 961

K

**Keto acid(s):** β-, decarboxylation, spectrophotometry, *Kornberg, Ochoa, and Mehler*, 159
**Ketone bodies:** Determination, *Lester and Greenberg*, 903
**Kidney:** Phosphatase, DL-alanine, L-glutamic acid, L-lysine, and L-histidine, effect, *Bodansky*, 465
*See also* Nephrectomy

L

**Lactobacillus casei:** Nutrition, factors, *Daniel, Scott, Heuser, and Norris*, 71
**Lecithin:** Blood serum, *Sinclair*, 343
**Leucine:** Growth, methionine relation, *Harding and Shive*, 743
Liver homogenate peptide, relation, *Borsook, Deasy, Haagen-Smit, Keighley, and Lowy*, 1041
**Lipide(s):** Oxidation products, thiobarbituric acid and, reaction, *Bernheim, Bernheim, and Wilbur*, 257
**Liver:** Enzyme, *l*-malic acid decarboxylation, effect, *Ochoa, Mehler, and Kornberg*, 979
Folic acid, *Olson, Fager, Burris, and Elvehjem*, 319
Homogenate peptide, isolation, *Borsook, Deasy, Haagen-Smit, Keighley, and Lowy*, 1041
— —, leucine turnover, *Borsook, Deasy, Haagen-Smit, Keighley, and Lowy*, 1041
Protein, radioactive carbon-labeled alanine incorporation, effect, *Frantz, Zamecnik, Reese, and Stephenson*, 773
**Lymphoid tissue:** Antibody, release, *Roberts, Adams, and White*, 379
**Lysine:** L-, phosphatase, intestine, bone, and kidney, effect, *Bodansky*, 465
Synthesis, *Neurospora, Mitchell and Houlahan*, 883

M

**Magnesium:** Muscle adenosinetriphosphatase activation, relation, *Kielley and Meyerhof*, 387
**Malaria:** *See also* SN-3294, SN-13276
**Malate:** -Pyruvate oxidation-reduction, enzymatic mechanism, *Mehler, Kornberg, Grisolia, and Ochoa*, 961

**Malic acid:** *l-*, decarboxylation, liver enzyme effect, *Ochoa, Mehler, and Kornberg,* 979
**Manure:** Chick growth factor, *Bird, Rubin, and Groschke,* 611
— — —, stability and solubility, *Bird, Rubin, and Groschke,* 611
**Melanosarcoma:** DL-Tyrosine labeled with radioactive carbon, distribution, *Reid and Jones,* 427
**Meningococcus:** Endotoxin, glucose phosphorylation, effect, *Kun,* 761
**Methionine:** -Deficient diet, DL-homoserine, growth, effect, *Armstrong and Binkley,* 889
Growth, leucine relation, *Harding and Shire,* 743
Oxy-, lipotropic activity and toxicity, *Shaffer and Critchfield,* 489
**Methoxinine:** Lipotropic activity and toxicity, *Shaffer and Critchfield,* 489
**Methoxy - 1,4 - naphthoquinone:** 2-, naturally occurring, isolation and antifungal action, *Little, Sproston, and Foote,* 335
**Methyl alcohol:** Blood acetol, administration effect, *Grant,* 93
**Methyl group:** Donor, dimethyl-β-propiothetin, *Maw and du Vigneaud,* 381
—, dimethylthetin, *du Vigneaud, Moyer, and Chandler,* 477
**Mold:** *See also Neurospora*
**Monomethyl-L-amino acid(s):** Demethylation, oxidative, *Ling and Tung,* 643
**Mosaic:** Tobacco, virus, blood serum albumin and, interaction, *Lauffer,* 481
**Muscle:** Adenosinetriphosphatase, magnesium-activated, *Kielley and Meyerhof,* 387
**Myosin:** Birefringence of flow, *Binkley,* 385
**Myrothecium verrucaria:** Enzyme, *Saunders, Siu, and Genest,* 697

N

**Naphthoquinone:** 2 - Methoxy - 1,4-, naturally occurring, isolation and antifungal action, *Little, Sproston, and Foote,* 335
**Nephrectomy:** Nitrogen metabolism study, use, *Engel, Pentz, and Engel,* 99
**Neurospora:** Growth, canavanine effect, *Horowitz and Srb,* 371
Lysine synthesis, *Mitchell and Houlahan,* 883
**Niacin:** Tryptophan-, transformation, pyridoxine deficiency, effect, *Ling, Hegsted, and Stare,* 803
-Tryptophan-deficient diets, amino acids, growth effect, *Hankes, Henderson, Brickson, and Elvehjem,* 873
**Nicotinic acid:** Synthesis, chick embryo, tryptophan relation, *Schweigert, German, and Garber,* 383
**Ninhydrin:** Determination, colorimetric, enzyme kinetics, use in study, *Schwert,* 411
**Nitrogen:** Isotopic, tissue, adrenalectomy and fasting effect, *White, Hoberman, and Szego,* 1049
Metabolism, nephrectomy effect, *Engel, Pentz, and Engel,* 99
**Nucleic acid:** Desoxypentose, adenine incorporation, *Brown, Petermann, and Furst,* 1043
Desoxyribo-. *See* Desoxyribonucleic acid
Pentose, adenine incorporation, *Brown, Petermann, and Furst,* 1043
Synthesis, *Escherichia coli* B, bacteriophage-infected, *Cohen,* 281
Yeast, cytidylic acid and diammonium uridylate preparation, *Loring, Roll, and Pierce,* 729
**Nucleotide:** Triphosphopyridine, chemical constitution, *Kornberg,* 1051
**Nucleotide pyrophosphatase:** Chemical constitution, *Kornberg,* 1051
**Nucleus:** Cell, arginase, *Dounce and Beyer,* 859
**Nutrition:** *Lactobacillus casei,* factors, *Daniel, Scott, Heuser, and Norris,* 71

O

**Oxalosuccinic acid:** Preparation and properties, *Ochoa*, 115

**Oxalosuccinic carboxylase:** *Ochoa and Weisz-Tabori*, 123

**Oxidase:** Xanthine, related enzymes and, 6-pteridyl aldehyde effect, *Kalckar, Kjeldgaard, and Klenow*, 771

**Oxygen:** Dihydrodiphosphopyridine nucleotide and, electron transport, coupled phosphorylation, *Friedkin and Lehninger*, 757

**Oxymethionine:** Lipotropic activity and toxicity, *Shaffer and Critchfield*, 489

P

**Palmitic acid:** Radioactive carbon-labeled, glucose from, alloxan diabetes, *Chaikoff, Lerner, Entenman, and Dauben*, 1045

**Pamaquine:** Determination, fluorometric, *Irvin and Irvin*, 589

Dissociation exponents, *Irvin and Irvin*, 577

**Pantothenic acid:** *King and Cheldelin*, 273

β-Alanine utilization, relation, *King and Cheldelin*, 273

Coenzyme A, determination, *Hegsted and Lipmann*, 89

Propionic acid utilization, relation, *King and Cheldelin*, 273

**Penicillin:** Benzyl-, radioactive sulfur-containing, isolation, counter-current distribution use, *Sato, Barry, and Craig*, 217

Crystalline, purity, counter-current distribution use, *Barry, Sato, and Craig*, 221

**Pentose nucleic acid:** Adenine incorporation, *Brown, Petermann, and Furst*, 1043

**Peptide:** Liver homogenate, isolation, *Borsook, Deasy, Haagen-Smit, Keighley, and Lowy*, 1041

— —, leucine turnover, *Borsook, Deasy, Haagen-Smit, Keighley, and Lowy*, 1041

**Periodate:** Hydroxy-L-proline oxidation by, *Carter and Loo*, 723

**Phenol:** Amino groups, cross-linking, *Fraenkel-Conrat and Olcott*, 827

**Phenylalanine:** L-, decarboxylation, *Streptococcus faecalis* rôle, *McGilvery and Cohen*, 813

**Phosphatase:** Adenosinetri-, muscle, magnesium-activated, *Kielley and Meyerhof*, 387

Bone, DL-alanine, L-glutamic acid, L-lysine, and L-histidine, effect, *Bodansky*, 465

Intestine, DL-alanine, L-glutamic acid, L-lysine, and L-histidine, effect, *Bodansky*, 465

Kidney, DL-alanine, L-glutamic acid, L-lysine, and L-histidine, effect, *Bodansky*, 465

Pyro-, blood cell, red, *Nagarina and Narayana menon*, 501

—, nucleotide, chemical constitution, *Kornberg*, 1051

**Phosphate(s):** Metabolism, shock effect, *Goranson, Hamilton, and Haist*, 1

**Phosphatidyl serine:** Chemical constitution, *Folch*, 439

**Phosphorus:** Bacteriophage desoxyribonucleic acids, origin, *Cohen*, 295

**Phosphorylation:** Coupled, dihydrodiphosphopyridine nucleotide and oxygen electron transport, *Friedkin and Lehninger*, 757

Glucose, meningococcal endotoxin effect, *Kan*, 761

**Pituitary:** *See also* Hypophysectomy

**Potassium:** Isotopes, biological material, distribution, *Mullins and Zeraln*, 107

**Pregnancy:** Sulfonamide in diet, erythropoiesis in fetus, effect, *Williamson and Appel*, 769

**Pregnen-3(β)-ol-20-one:** 5-, testis extract, isolation and identification, *Haines, Johnson, Goodwin, and Kuizenga*, 925

**Progesterone:** Blood serum solubility, *Bischoff and Pilhorn*, 663
Protein solution solubility, *Bischoff and Pilhorn*, 663
Salt solution solubility, *Bischoff and Pilhorn*, 663
**Proline:** Derivatives, *Escherichia coli* mutant strains, utilization, *Simmonds and Fruton*, 705
Hydroxy-L-, oxidation, periodate effect, *Carter and Loo*, 723
**Propionic acid:** Utilization, pantothenic acid relation, *King and Cheldelin*, 273
**Protein(s):** Blood serum, injury effect, *Gjessing, Ludewig, and Chanutin*, 683
-Formaldehyde reaction, *Fraenkel-Conrat and Olcott*, 827
Liver, radioactive carbon-labeled alanine incorporation, effect, *Frantz, Zamecnik, Reese, and Stephenson*, 773
Solutions, testosterone, progesterone, and α-estradiol solubility, *Bischoff and Pilhorn*, 663
Synthesis, *Escherichia coli* B, bacteriophage-infected, *Cohen*, 281
—, — — effect, *Melchior, Mellody, and Klotz*, 81
**Proteolysis:** Enzymes, tissue, *Gutmann and Fruton*, 851
**Prothrombin:** Calcium effect, *Ware and Seegers*, 565
Purification, *Ware and Seegers*, 565
Thrombin effect, *Ware and Seegers*, 565
Thromboplastin effect, *Ware and Seegers*, 565
**Pteridyl aldehyde:** 6-, xanthine oxidase and related enzymes, effect, *Kalckar, Kjeldgaard, and Klenow*, 771
**Pteroylglutamic acid:** Analogues, *Woolley and Pringle*, 327
Pyrimidine derivatives, relation, *Hitchings, Elion, VanderWerff, and Falco*, 765
**Pyridine:** Dihydrodiphospho-, nucleotide, oxygen and, electron transport, coupled phosphorylation, *Friedkin and Lehninger*, 757
**Pyridine**—*continued:*
**Pyridoxine:** Deficiency, tryptophan-niacin transformation, effect, *Ling, Hegsted, and Stare*, 803
Displacement, *Martin, Avakian, and Moss*, 495
**Pyrimidine:** Derivatives, pteroylglutamic acid, relation, *Hitchings, Elion, VanderWerff, and Falco*, 765
**Pyrophosphatase:** Blood cell, red, *Naganna and Narayana menon*, 501
Nucleotide, chemical constitution, *Kornberg*, 1051
**Pyrrolidonecarboxylic acid:** Polarimetry, *Kibrick*, 845
**Pyruvate:** Isocitrate-, oxidation-reduction, enzymatic mechanism, *Mehler, Kornberg, Grisolia, and Ochoa*, 961
Malate-, oxidation-reduction, enzymatic mechanism, *Mehler, Kornberg, Grisolia, and Ochoa*, 961

## Q

**Quinine:** Dissociation exponents, *Irvin and Irvin*, 577
**Quinolylpiperidylcarbinol:** Dissociation exponents, *Irvin and Irvin*, 577

## S

**Salicylate:** Blood, determination, fluorophotometric, *Saltzman*, 399
**Salt:** Solutions, testosterone, progesterone, and α-estradiol solubility, *Bischoff and Pilhorn*, 663
**Sarcoma:** Melano-, DL-tyrosine labeled with radioactive carbon, distribution, *Reid and Jones*, 427
**Scurvy:** Antipernicious anemia extracts and tyrosine metabolism, relation, *Sealock and Lepow*, 763
**Serine:** Homo-. *See* Homoserine
Phosphatidyl, chemical constitution, *Folch*, 439
**Shock:** Carbohydrate metabolism, effect, *Goranson, Hamilton, and Haist*, 1
Phosphate metabolism, effect, *Goranson, Hamilton, and Haist*, 1

**SN-3294**: Determination, fluorometric, *Irvin and Irvin*, 589
**SN-13276**: Determination, fluorometric, *Irvin and Irvin*, 589
**Sphingomyelin**: Blood serum, *Sinclair*, 343, 355
**Staphylococcus**: Toxin, solubility, *Wittler and Pillemer*, 23
**Steroid(s)**: Hormones, biological systems, *Bischoff and Pilhorn*, 663
**Stomach**: Mucosa, blood group A-specific substance, *Holzman and Niemann*, 305
**Streptococcus faecalis**: L-Phenylalanine decarboxylation, rôle, *McGilvery and Cohen*, 813
**Streptomycin**: Counter-current distribution, *Titus and Fried*, 57
Tautomerism, *Titus and Fried*, 57
**Succinic**: Oxalo-, carboxylase, *Ochoa and Weisz-Tabori*, 123
**Succinic acid**: Oxalo-, preparation and properties, *Ochoa*, 115
**Sugar**: Blood. *See* Blood sugar
**Sulfhydryl reagent(s)**: Enzyme inhibition, mechanism, *Singer*, 11
**Sulfonamide**: Maternal diet, erythropoiesis in fetus, effect, *Williamson and Appel*, 769
**Sulfur**: -Containing amino acids, *Escherichia coli* mutant strains, utilization, *Simmonds*, 717
Radioactive, benzylpenicillin containing, isolation, counter-current distribution use, *Sato, Barry, and Craig*, 217

T

**Testis**: Extract, *Haines, Johnson, Goodwin, and Kuizenga*, 925
—, 5-pregnen-3(β)-ol-20-one isolation and identification, *Haines, Johnson, Goodwin, and Kuizenga*, 925
**Testosterone**: Blood serum solubility, *Bischoff and Pilhorn*, 663
Protein solution solubility, *Bischoff and Pilhorn*, 663
Salt solution solubility, *Bischoff and Pilhorn*, 663
**Thetin**: Dimethyl-, methyl donor, *du Vigneaud, Moyer, and Chandler*, 477
Dimethyl-β-propio-, methyl donor, *Maw and du Vigneaud*, 381
**Thienylalanine**: β-2-, optical isomers, microbial growth, effect, *Ferger and du Vigneaud*, 241
**Thiobarbituric acid**: Lipide oxidation products and, reaction, *Bernheim, Bernheim, and Wilbar*, 257
**Thrombin**: Pro-. *See* Prothrombin
Prothrombin, effect, *Ware and Seegers*, 565
**Thromboplastin**: Prothrombin, effect, *Ware and Seegers*, 565
**Thyroid**: Function, blood plasma inorganic iodide relation, *Wolff and Chaikoff*, 555
**Tobacco**: Mosaic virus, blood serum albumin and, interaction, *Lauffer*, 481
**Toxin(s)**: Immunochemistry, *Wittler and Pillemer*, 23
*Staphylococcus*, solubility, *Wittler and Pillemer*, 23
**Toxoid(s)**: Immunochemistry, *Wittler and Pillemer*, 23
**Tricarboxylic acid(s)**: Biosynthesis, carbon dioxide fixation rôle, *Ochoa*, 115
*Ochoa and Weisz-Tabori*, 123
*Ochoa*, 133
Carbon dioxide fixation, enzymatic mechanisms, *Ochoa*, 133
**Triphosphopyridine nucleotide**: Chemical constitution, *Kornberg*, 1051
**Trypsin**: Chymo-. *See* Chymotrypsin
**Tryptophan**: Chick embryo nicotinic acid synthesis, relation, *Schweigert, German, and Garber*, 383
Metabolism, vitamin $B_6$ rôle, *Junqueira and Schweigert*, 605
-Niacin transformation, pyridoxine deficiency, effect, *Ling, Hegsted, and Stare*, 803
-Niacin-deficient diets, amino acids, effect, *Hankes, Henderson, Brickson, and Elvehjem*, 873
**Tyrosine**: D-, growth, effect, *Bubl and Butts*, 637

**Tyrosine**—*continued:*
DL-, radioactive carbon labeled with, melanosarcoma, distribution, *Reid and Jones*, 427
Metabolism, antipernicious anemia extracts and, scurvy, relation, *Sealock and Lepow*, 763

V

**Van Slyke:** Apparatus, blood gas, microvolumetric, *Whiteley*, 947
**Vasoconstrictor:** Blood serum, purification, *Rapport, Green, and Page*, 735
**Virus:** Bacterial, synthesis, *Cohen*, 281, 295
Tobacco mosaic, blood serum albumin and, interaction, *Lauffer*, 481
**Vitamin(s):** A, fetus, cholesterol-high maternal diet, effect, *Williamson*, 631
**Vitamin(s)**—*continued:*
A, utilization, media, *Halpern and Biely*, 817
$B_6$, tryptophan metabolism, rôle, *Junqueira and Schweigert*, 605
$B_{12}$, crystalline, chick growth, effect, *Ott, Rickes, and Wood*, 1047
$B_{12}$, distillers' solubles, growth, effect, *Novak and Hauge*, 647

X

**Xanthine:** Oxidase, related enzymes and, 6-pteridyl aldehyde effect, *Kalckar, Kjeldgaard, and Klenow*, 771

Y

**Yeast:** Nucleic acid, cytidylic acid and diammonium uridylate preparation, *Loring, Roll, and Pierce*, 729
